

SI 618 Fall 2021 Lab 7 – The Role of Crowd-work in AI and Data Science

You need to do this week's lab and homework in pairs. Find yourself a partner and read the Harvard Business Review article, ["The Humans Working Behind the AI Curtain"](#) . Discuss the article with your partner and answer the following questions

1. What are the main themes regarding crowd-work that are discussed in this article? (5-6 sentences)
2. Building on these themes or otherwise, what do you think are important considerations (technical and/or social) to be made when employing crowd-workers for AI or Data Science projects? (1-2 issues, 3-4 sentences)

You and your partner can discuss the article and these questions together but write separate paragraphs for the 2 questions. For the 2nd question, each of you should write on at least one unique consideration.

Consolidate both sets of answers into a single document. Please put your name and username before your answers.

Format should look like:

Danaja Maldeniya (dmal)
<Responses>

Ceren Budak (cbudak)
<Responses>

Submit a PDF document named `username1_username2_si618_lab7.pdf` Only one submission is required per team.
